**NJM/CLI Exhibits Versatile Auto-Colt III Labeler
at Pack Expo Las Vegas**

July 13, 2005 – NJM/CLI presents the in-line Auto-Colt III pressure sensitive labeler at its Pack Expo Las Vegas Booth #C-1600. NJM/CLI can equip the versatile Auto-Colt III with a wide range of options, making it ideal for many pharmaceutical and nutraceutical applications.

When equipped with optional RFID components, the RFID Integrated Auto-Colt III System applies and verifies RFID tags on bottles and other item level containers using the primary labeler. This RFID option allows manufacturers to combat counterfeiting and improve track-and-trace throughout the supply chain, thus achieving a higher level of security and control.

Integrating the Auto-Colt III with an overhead belt, pneumatic wipers and a rotary applicator, the system can label round containers with a partial wrap label and orient the bottle to accurately apply an outsert to the gap with tolerances of less than 1/16 inch. This challenging application, which traditionally required an expensive rotary labeler, can now be achieved with an economical in-line labeler. With this option, the Auto-Colt III reduces capital costs, minimizes floor space requirements, simplifies maintenance and speeds changeover.

The standard servo-driven stainless steel Auto-Colt III handles round, oval, square and rectangular containers from 1 to 14 inches in height and from 5/8 to 7 inches in diameter at speeds up to 250 cpm. It can apply wrap around labels as well as single and multi-panel labels. The labeler can be changed over in less than 15 minutes with no tools required.

About NJM/CLI

NJM/CLI designs, manufactures and supplies a complete range of packaging equipment, offering customers single source responsibility, turnkey line integration services, full validation support, and after sales service and support. This benefits customers packaging pharmaceutical/nutraceutical/vitamin and personal care products. By manufacturing machines and supplying quality equipment from other leading manufacturers, NJM/CLI provides integrated lines that include a wide variety of machines, including RFID tagging solutions. NJM/CLI maintains corporate headquarters in the USA and Canada.
