**NJM/CLI Offers Affordable Wrap-Around Labeling with the New MiniColt Labeler;  
Compact and Easy to Use, the Rugged MiniColt Achieves Excellent Labeling Accuracy**

June 10, 2003 – NJM/CLI introduces the new Model 120 MiniColt Labeler, designed to offer reliable wrap-around labeling at an affordable price. Featuring a compact footprint and user-friendly controls, the MiniColt Labeler is easy to install and easy to operate. Handling up to 120 containers per minute, the new MiniColt is ideal for packagers that need a simple wrap-around labeler.

The MiniColt Labeler handles round containers from 1 inch to 8 inches in height (25.4 to 203 mm) with diameters from 1/2 inch to 4 inches (12.7 to 101.6 mm). The labeler accepts a 14-inch diameter label spool.

With its heavy-duty stainless steel construction, open frame design, high quality components and raised bed sanitary conveyor, the MiniColt Labeler offers superior durability while meeting GMP standards. NJM/CLI's brushless disc dynamic brake web drive technology reduces maintenance and downtime to help maximize production efficiency. The compact MiniColt requires only six feet on the production line and 45 inches in depth.

Designed for ease of operation, NJM/CLI's MiniColt can be changed over in less than five minutes. The user-friendly control panel and all mechanical adjustments are accessible from one side of the labeler to ease set-up and changeover.

The MiniColt features a variable speed spacing wheel that contributes to reliably repeatable labeling performance. A drum wrap-around holds bottles by the shoulder during the label application stage, improving the accuracy of the label placement compared to traditional belt systems.

[please see page two](#)

The MiniColt can easily be equipped, in the factory or in the field, with a hot stamp coder to add lot codes and expiration dates.

**About NJM/CLI**

NJM/CLI designs, manufactures and supplies a complete range of packaging equipment, offering its customers single source responsibility, turnkey line integration services and full validation support. Complementing its vast array of self-manufactured packaging machines, NJM/CLI also supplies quality equipment from other leading manufacturers. NJM/CLI offers complete packaging lines; equipment includes bottle unscramblers, tablet counters, liquid fillers, blister packaging machines, cottoners, cappers, induction sealers, cap retorquers, tamper evident banders, labelers, cartoners, print & apply labelers, shrink wrappers, conveyors, turntables, accumulating tables and more. NJM/CLI maintains corporate headquarters in Lebanon, NH (USA) and Pointe-Claire, QC (Canada).
