

*Applications: pharmaceutical, food, beverage, chemical and other industrial markets*

## **NJM/CLI Introduces New Print & Apply Model 400 with Multi Panel Applicator to Maximize Production Flexibility and Speed Changeover**

December 8, 2005 – NJM/CLI introduces the Print & Apply Model 400 with Multi Panel Applicator at its Interpex Booth #529. With a single tool, the new P&A Labeler can apply a wide variety of label configurations to cases and cartons, increasing production flexibility and speeding changeover.

The Print & Apply Model 400 with Multi Panel Applicator features a stepper motor driven vacuum belt that stages the labels prior to application. This unique system smoothes the label application operation and helps achieve high speeds. Handling up to 15 cases or cartons per minute, NJM/CLI's new P&A Labeler can apply one leading-and-side-panel corner wrap, one leading-and-top-panel corner wrap, a front panel label, a side panel label, a top panel label or even two separate labels – front and side – in one pass.

Ideal for high changeover environments where tremendous production flexibility is needed, the Print & Apply Model 400 with Multi Panel Applicator can be changed over in less than one minute with no tools and no change parts required. The electronic changeover is accomplished simply by changing the settings on the touch screen control panel.

### **About NJM/CLI**

NJM/CLI designs, manufactures and supplies a complete range of packaging equipment, offering customers single source responsibility, turnkey line integration services, full validation support, and after sales service and support. This benefits customers packaging pharmaceutical/nutraceutical/vitamin and personal care products. By manufacturing machines and supplying quality equipment from other leading manufacturers, NJM/CLI provides integrated lines that include a wide variety of machines, including RFID tagging solutions. NJM/CLI maintains corporate headquarters in the USA and Canada.
