

For Immediate Release:

Auto-Colt III Labeler from NJM/CLI Handles Challenging New Application

October 20, 2004 – NJM/CLI announces that the in-line Auto-Colt III pressure sensitive labeler is being successfully used in the field for a challenging application that traditionally required an expensive rotary labeler. The stainless steel Auto-Colt III is now being used to label round containers with a partial wrap label and to orient the bottle to accurately apply an outsert to the gap in the partial wrap label with tolerances of less than 1/16 inch.

NJM/CLI can equip the versatile Auto-Colt III with a wide range of options, making it ideal for many pharmaceutical applications. The latest advancement is achieved by modifying the Auto-Colt III with an overhead belt, pneumatic wipers and a rotary applicator. With the success of this challenging application, NJM/CLI allows pharmaceutical manufacturers to utilize an economical in-line labeler where complex rotary labelers were previously required. Auto-Colt III reduces capital costs, minimizes floor space requirements, simplifies maintenance and speeds changeover.

The servo-driven Auto-Colt III handles round, oval, square and rectangular containers from 1 to 14 inches in height and from 5/8 to 7 inches in diameter at speeds up to 250 cpm. It can apply wrap around labels as well as single and multi-panel labels. The labeler can be changed over in less than 15 minutes with no tools required.

About NJM/CLI

NJM/CLI designs, manufactures and supplies a complete range of packaging equipment, offering customers single source responsibility, turnkey line integration services and full validation support. This “total solution” benefits customers packaging pharmaceutical, cosmetic/personal care, food, beverage, household chemical and other products. By self-manufacturing a vast array of packaging machines and supplying quality equipment from other leading manufacturers, NJM/CLI provides integrated lines that include liquid fillers, tablet counters, cappers, labelers, blister packers, cartoners, print & apply labelers, RFID tagging solutions, shrink wrappers and a range of other equipment.
